our best compromise for performance and comfort (noise, pedal feel and wheel dust). Environmentally-friendly, contains no copper, no hazardous constituents, low-dust emission.

**WEAR**

- Mojacar simulation
  - Very low pad wear. Low rotor wear. In target with OE requirements.

- Block-wear
  - Excellent block-wear properties.

**WHEEL-DUST**

Test run on vehicle. Direct comparison of OE material with our AS444H.

- Low dust emission.

**METAL PICK-UP (MPU)**

- Very low MPU even in presence of salt.

**COMFORT**

- Very good pedal feeling
- Noise:

**PERFORMANCE**

- Nominal µ: 0.44. Good speed and pressure sensitivity. Good Fading, good water sensitivity. Good AMS and HAMS performance.

**SUMMARY**

- High friction level with good stability with speed, pressure and temperature.
- Low wear and low wheel dust.
- Low noise propensity.
